

Inicio

```
graph TD; Inicio([Inicio]) --> Leer[/Leer pvr<br/>Leer pvp/]; Leer --> Procesar[descont = pvp - pvr<br/>percent = descont * 100 / pvp]; Procesar --> Escribir[/Escribir percent/]; Escribir --> Fin([Fin]);
```

The flowchart is a vertical sequence of five steps connected by downward-pointing arrows. It starts with an oval labeled 'Inicio', followed by a parallelogram for input 'Leer pvr' and 'Leer pvp'. The third step is a rectangle containing two mathematical formulas: 'descont = pvp - pvr' and 'percent = descont \* 100 / pvp'. This is followed by another parallelogram for output 'Escribir percent', and finally an oval labeled 'Fin'.

Leer pvr  
Leer pvp

$\text{descont} = \text{pvp} - \text{pvr}$   
 $\text{percent} = \text{descont} * 100 / \text{pvp}$

Escribir percent

Fin
